Index to Documents Produced on August 15, 2008**

Northwest Terminal Documents¹

With respect to the Northwest Terminal parcel, while Beazer objects to the USEPA's various instructions and definitions with respect to the identification of specific documents and sources of information as being overly burdensome and duplicative, Beazer has compiled responsive documents into the following categories:

- 1) Environmental Permits (with the exception of NPDES) NWT000001-49;
- 2) Sewers/NPDES/Outfalls/Stormwater NWT000050-001669;
- 3) Waste Treatment/Waste Disposal/Solid Wastes NWT001670-1845;
- 4) Plant Design and Operation NWT001846-2004;
- 5) NOV's, Citations, etc. NWT002005-2118;
- 6) Air Issues NWT002119-2268;
- 7) Leases & Easements NWT002269-2310;
- 8) Release Incidents NWT002311-2387;
- 9) Dock Activities NWT002388-2421;
- 10) Environmental Investigation & Data NWT002422-3735; and
- 11) Miscellaneous NWT003736-3752.

¹ Documents containing more than one type of responsive information have been placed into the folder judged to be most pertinent. Beazer is producing a CD-ROM with PDF images of the documents sorted into the referenced categories. While Beazer's responses are based upon its reasonable review of all the documents being produced, Beazer has attempted, where appropriate, to identify the above-described document folder or folders which may contain information responsive to the USEPA's specific requests.
